

William Barkoff

Web Developer

EXPERIENCE

Pulse Wearables

Co-Founder and Technology Lead – Jun 2017 to present
<https://pulsewearables.com/> - Worked on a 4 person team

Pulse Wearables is a medical wearable technology company that produces a sticker patch to measure the electrical activity of the wearer's heart and notify them if there are issues

MyHomeworkSpace

Web Developer – Sep 2015 to present
<https://myhomework.space/> - Worked on a 2 person team

MyHomeworkSpace is an online planner designed to help you organize your life. It features "Homework View" which divides your to-do list into easy to see columns to prevent you from being blindsided.

PROJECTS

DaltonTab

Nov 2015 to present
<https://github.com/ultimathexers/daltontab> - Worked on a 5 person team
Winner of TigerHacks 2015 Hackathon

DaltonTab is a Chrome and Firefox extension which replaces your new tab page with a page outlining your assignments, homework, classes, and more.

CoursesPlus

Sep 2015 to Jun 2017 - Worked on a 2 person team
<https://coursesplus.github.io/>

CoursesPlus was a chrome extension which ma

Honor with Code

Sep 2015 to present
<https://coursesplus.github.io/>

A Chrome extension that adds features and improvements to the (now defunct) Courses website that was used at my school.
